

Instruction for Cystatin C (CYS-C) QC

[Product Name]

Cystatin C (CYS-C) QC

【Package Specification】

Applicable for PA50&PA54				
REF No.	Level	Specification		
32081029	QC(N)	0.2ml/bottle × 2		
32081028	QC(H)	0.2ml/bottle × 2		

Applicable for PA120				
REF No.	Level	Specification		
32081091	QC(N)	0.2ml/bottle × 2		
32081090	QC(H)	0.2ml/bottle × 2		

[Intended Use]

CYS-C QC is designed for quality control of Cystatin C (CYS-C) detection by in vitro immune diagnostic system.

[Precaution]

This product is only used for in vitro diagnosis. Dispose the reagents according to the usual laboratory precautions.

Absorb the required amount for each use, and the remaining samples should not be returned to the original bottle.

If the quality control product is contaminated, the stability of the components will be decreased, it should be stop using and a new quality control product should be selected.

[Main Composition]

CYS-C antigen

[Storage and Stability]

opened, the reagents stored at 2-8°C are stable for 30 days.

[Instructions for use]

The quality control product is liquid ready-to-use type. The usage is as follows:

- for 5-10 minutes before mixing.
- 2. Gently invert at least 3 times before sampling, but avoid bubbles.
- 3. Open the bottle carefully to avoid ejecting the contents.
- 4. After sampling, cover the bottle cap as soon as possible and store it in a sealed condition of 2 ~ 8°C in time.

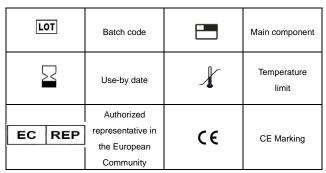

For specific usage, please refer to the corresponding kit instruction.

Assigned the quality control product in the company laboratory, using kit and specific protein analyzer, the methodology was Nephelometry.

The assignment result is shown on the QC bottle label.
